

CART

TCCARTADV A frame cart ADV with four wheels is used to transport large tiles and slabs around the job site.

This cart is lightweight thanks to the design and its aluminum components which is strong for a maximum load of 551 lbs.

Comes with two height adjustable hooks for holding slabs and easy-move frame.

CARTING SOLUTION

The storage side of the cart includes two height adjustable rubber supports as well as telescopic safety hooks to prevent two or more slabs from slipping or falling

Both sides of the cart include wooden plate supports with rubber edges for safe support of large format tiles.

Two of the four wheels have brakes to prevent the cart from accidental moving.

EASY-MOVE

Easy-move full frame can be placed on the Cart for easy maneuvering of large tiles and slabs.

BACK BUTTER

Easy and safe application of adhesive to the back of the tile called "back-buttering"

SECURE

Easy-move provides easy lifting, the TCEMFF8V full frame is fitted with two handles on each profile. Double handles (TCEM4DGH) are available for extra stability.
